EXAMINER'S AMENDMENT & STATEMENT OF REASONS FOR ALLOWANCE

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Mark A. Davis on 29 September 2004.

The application has been amended as follows:

Claim 9:

In line 9, before "fastener" insert "--sealing--".

Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter:
2. The closest prior art of record is DE 2410279 to Parlour et al. & U.S. Patent No. 3,849,815 to Frauendorf. Specifically, Parlour *et al.* discloses a garment treating apparatus including a collapsible container ("flexible sack" enclosure) with container opening (closed by door 16a), a humidity provider ("steam generator") a heating element and air circulation device ("hot air blower"), and at least one vent and/or filter ("vent"), and fastener with interlock for locking the fastener ("sliding clasp fastener", *i.e.*

a zipper). Frauendorf discloses a garment treating appliance including a container, a humidity provider, a heating element, a vent, an air circulation device, and an interlock with a controller operably coupled to a fastener. However, Parlour *et al.* & Frauendorf fail to teach or reasonably suggest the claimed garment treating apparatus having a collapsible, flexible container and a controller coupled to the locking mechanism of a "sealing fastener" for the purpose of preventing accidental opening during operation, which is disclosed as an essential element of claimed invention, as described in claim 9.

3. For at least the foregoing reasons, claims 9-20 are believed to recite patentable subject matter.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: U.S. Patent No. 3,752,373 to Smith, which discloses a collapsible wardrobe refresher/steamer including a zipper latching mechanism.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph L. Perrin, Ph.D. whose telephone number is (571)272-1305. The examiner can normally be reached on M-F 7:00-4:30, except alternate Fridays.
